

Ashir N Basheer

Software Engineer

✉ ashirnbasheer@gmail.com | +91 79075 02612 | Kochi, Kerala | github.com/ashcoder666

PROFILE SUMMARY

- Software Engineer** with 4+ years of experience designing, developing, and deploying **scalable web applications** across fintech, automotive, and SaaS domains using **Node.js, TypeScript, React, and AWS**.
- Proven ability to **architect end-to-end systems**, integrate APIs, automate DevOps pipelines with **Docker and CI/CD**, and lead small teams to deliver high-performance, production-ready solutions.
- Passionate about **clean architecture, performance optimization, and cloud-native development**, with a track record of improving system efficiency, reducing costs, and elevating user experience.

PROFESSIONAL EXPERIENCE

ISPG Technologies, Software Engineer - Team Lead 11/2024 – Present | Kochi, Kerala

- Spearheading backend and DevOps development for an enterprise automotive SaaS platform using **Node.js, TypeScript, and AWS**.
- Architected and deployed microservices that improved API response time by **45%** and reduced infrastructure costs by **25%** through container optimization with **Docker**.
- Designed CI/CD pipelines ensuring zero-downtime deployments and faster release cycles, cutting manual effort by **70%**.
- Leading 3+ engineers in code reviews, architecture decisions, and backend performance improvements.

Etelligens Technologies, Software Engineer 05/2024 – 11/2024 | Noida, Delhi NCR

- Developed and optimized scalable **fintech APIs** handling secure financial transactions with **Node.js, Express, and MongoDB**.
- Introduced **Redis caching** and query optimization, reducing API latency by **40%** and improving throughput under high load.
- Delivered complex third-party payment integrations (Razorpay, Stripe) with 100% compliance and security validation.
- Collaborated directly with clients across the US and India, delivering projects **ahead of schedule by 2 sprints**.

Metric Tree Labs Pvt. Ltd, Software Engineer 01/2023 – 04/2024 | Kochi, Kerala

- Designed and deployed **microservice-based architecture** for enterprise-grade products using **Nest.js, PostgreSQL, and AWS ECS**.
- Reduced build and deployment times by **70%** through full CI/CD automation using **GitHub Actions** and **Docker**.
- Collaborated with cross-functional teams to translate business logic into production-ready APIs, maintaining 99.9% uptime.
- Mentored 4+ junior engineers, improving code quality and delivery consistency through structured peer review sessions.

Littra Technologies, Associate Software Engineer 01/2022 – 12/2022 | Bengaluru, Karnataka

- Delivered full-stack features using **React.js, Node.js, and MySQL**, improving end-user load times by **30%**.
- Built modular, reusable REST APIs and reduced redundant backend calls by **25%** through optimized data fetching strategies.
- Collaborated with UI/UX teams to refine component structures and improve frontend performance.

PROJECTS

Oorjit – Automotive E-commerce Platform

- Developed and deployed backend services for a multi-brand automotive retailing platform using **Node.js, Nest.js, PostgreSQL, Redis, and AWS**, enabling real-time vehicle listings, inventory sync, and improved response time by **40%** through optimized APIs and caching.

Atlas NBFC – Fintech Loan Management System

- Led the backend architecture and API development using **Node.js, Express.js, MongoDB, MySQL, and Docker**, powering secure loan workflows, flexible repayment logic, and seamless client-side integrations with **99.9% uptime**.

RayNext ERP – End-to-End Enterprise Resource Planning Platform

- Designed and developed a comprehensive **ERP system** covering **billing, purchase, inventory, journaling, and accounting modules**, built with **React.js (Next.js)** for the frontend and **Node.js (Nest.js, Express.js)** for the backend using **microservices architecture**.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Bash, Golang (Intermediate)

Frameworks & Libraries: Node.js, Express.js, Nest.js, Hapi.js, React.js, Next.js, Gin, Fiber, Flask

Backend & API Development: RESTful APIs, Microservices Architecture, Server-Side Rendering (SSR), WebSockets, GraphQL, gRPC

Databases & Caching: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

DevOps & Cloud Technologies: AWS (EC2, S3, Lambda, VPC), Docker, CI/CD Pipelines (GitHub Actions, Jenkins), Kubernetes, Linux

Messaging & Event Systems: RabbitMQ, Kafka (Basic), Socket.io

Tools & Project Management: Git, Jira, Postman, VS Code, Agile/Scrum, SDLC

EDUCATION

Master of Computer Applications (MCA), Chandigarh University Mohali, Punjab

- Focused on **advanced software architecture, distributed systems, and cloud-native application development**.

Bachelor of Computer Applications (BCA), Bengaluru City University Bengaluru, Karnataka

- Built a strong foundation in **data structures, web technologies, and software engineering principles**.

CERTIFICATES

AWS Cloud Practitioner – Great Learning (May 2023)

- Hands-on experience with **EC2, S3, Lambda, DynamoDB**, and **serverless architecture design** for scalable and cost-optimized deployments.

System Design & Software Architecture – Udemy (2024)

- Covered **high-level system design, microservices architecture, database sharding, and scalability strategies**, applying real-world case studies for robust backend solutions.
